TABLES WITH THE TYPOS FIXED

Bower-Bir, J. S. (2022). Desert and redistribution: Justice as a remedy for, and cause of, economic inequality. *Policy Studies Journal* 50(4): 757–795. https://doi.org/10.1111/psj.12439

The published tables with their typos corrected, estimated on the published sample of 992 observations. That sample holds one respondent's record twice, and its survey weight placed 54 respondents in the wrong income group; the final tables, with both corrected, are in `tables_final.pdf`. Neither set changes the article's findings or interpretation. One sentence of the article calls the Age² coefficient positive (the published tables print it as 0.000), but it is slightly negative, which these tables show as −0.000. Coefficients that round to zero keep their sign. The constant is the grand-mean intercept, as Stata reports it; its standard error is an approximation and may differ from the published value in the third decimal. The final section lists every cell that differs from the published tables, with the published and corrected values side by side.

Table 1 · Table A1 · Table C1 · Table C2 · Table D1 ·
The marginal effects in Figures D1 and D2 · Changed cells

THE MARGINAL EFFECTS IN FIGURES D1 AND D2

Each line's value at the two ends of its horizontal axis, with its standard error. In D1 that is the marginal effect of Definition at Z = 0 and Z = 1. In D2 it is the marginal effect of Z at Definition = 0 and Definition = 1.

PANEL	TABLE D1 MODEL	AT 0	SE	AT 1	SE	N
