TABLES WITHOUT THE DUPLICATED RECORD

Bower-Bir, J. S. (2022). Desert and redistribution: Justice as a remedy for, and cause of, economic inequality. *Policy Studies Journal* 50(4): 757–795. https://doi.org/10.1111/psj.12439

The fully corrected tables, re-estimated on the deduplicated dataset of 991 distinct respondents, with the survey weight raked again on those rows. Nothing in the corrected tables changes the article's findings or interpretation. One sentence of the article calls the Age² coefficient positive (the published tables print it as 0.000), but it is slightly negative, which these tables show as −0.000. Coefficients that round to zero keep their sign. The constant is the grand-mean intercept, as Stata reports it; its standard error is an approximation. The final section lists every cell that changes when moving from the 992-observation dataset to the deduplicated 991-observation dataset, with the two values side by side.
