TABLES WITHOUT THE DUPLICATED RECORD

Bower-Bir, J. S. (2022). Desert and redistribution: Justice as a remedy for, and cause of, economic inequality. *Policy Studies Journal* 50(4): 757–795. https://doi.org/10.1111/psj.12439

The same tables as the corrected set, re-estimated on the 991 distinct respondent records after dropping the one record that appears twice in the survey file, with the survey weight raked again on those rows. The final section lists every cell that changes at the printed precision. Coefficients that round to zero keep their sign. The constant is the grand-mean intercept, as Stata reports it; its standard error is an approximation.
